WE ARE JAN EVANGELISTA PURKYNĚ UNIVERSITY IN ÚSTÍ NAD LABEM

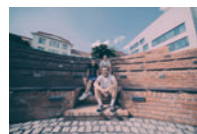

We are named after the North Bohemian scientist Jan Purkyně who comes from Libochovice (1787–1869). Purkyně is among the founders of biology, embryology, histology, modern pharmacology, comparative anatomy, anthropology, and is also among the most important physiologists in the world.

In his time Purkyně was an expert in many fields. That's why we offer a wide range of study programs and focus on a wide variety of human activity – but it is not only because of our diversified areas of study we are interesting to today's young people.

We are the most modern scientific, pedagogical, and cultural educational center in the Ústí Region. We educate more than 8,500 students and employ 1,100 workers. We are proudly located in the city of Ústí nad Labem and contribute significantly to the development of our region.

We have been a university since 1991, and currently house 8 faculties:

Faculty of Mechanical Engineering
Faculty of Environment
Faculty of Art and Design
Faculty of Arts
Faculty of Health Studies
Faculty of Science
Faculty of Education
Faculty of Social and Economic Studies

#studujemeujep

#cpto_ujep

OUR HISTORY

Our history begins in 1954, when the Higher Pedagogical School was founded. This school changed to the Pedagogical Institute in 1959 and subsequently in 1964 the Faculty of Education was founded in Ústí nad Labem. Ex lege, by Act No. 314/1991 Coll. the J.E. Purkyně University in Ústí nad Labem was established and inaugurated on September 28, 1991, with three faculties and one institute – The Faculty of Education, The Faculty of Social and Economic Studies, The Faculty of Environment and Institute of Slavic and Germanic Studies.

- 1993** The UJEP Institute of Fine Arts was founded as an art school with an artistic–industrial orientation
- 1998** The Institute of Technology and Production Management was established within UJEP
- 2000** The Faculty of Applied Art and Design UJEP was established, which was transformed from the existing Institute of Visual Culture
- 2003** The Institute of Health Studies UJEP was established
- 2005** The Institute of Humanities and the Institute of Natural Sciences of UJEP were established; the Institute of Natural Sciences transformed into the Faculty of Science of UJEP
- 2006** The Institute of Humanities transformed into the Faculty of Arts of UJEP, The Institute of Technology and Production Management transformed into the Faculty of Production Technologies and Management of UJEP
- 2008** The Institute of Slavic–Germanic Studies became a part of the Faculty of Arts; The Faculty of Applied Arts and Design changed its name to the Faculty of Art and Design of UJEP
- 2012** The Institute of Health Studies became the Faculty of Health Studies of UJEP
- 2017** The Faculty of Production Technologies and Management was renamed the Faculty of Mechanical Engineering of UJEP

#fzs_ujep

LOCATION

Ústí nad Labem is accessible by several types of transport, including the highway that runs between Prague and Dresden and train connections from Liberec, Prague, Mělník and Teplice.

We are also on the main route of the EuroCity trains run to and from Germany where you can comfortably sit down in the diner and enjoy the journey through the Elbe Valley.

Just don't fall asleep or you might wake up near the Baltic sea.

#pridejseknamnasever

WHY SHOULD YOU STUDY AT UJEP?

Here in the north, life is a bit rougher than elsewhere. Our region is still healing from the scars caused by surface mining, heavy industry, and insensitive construction activities.

At the same time, Ústí nad Labem is developing dynamically. Post-industrial brownfields provide a breeding ground for creative experiments at the boundaries between art, sociology, and real life.

Projects are growing up from the ruins, such as the cultural center of Hraničář, which supplies the city with progressive cultural events. There is the indestructible Činoherák theater, which is known even in Prague and which, if thrown out of the front door sneaks in the back door.

Half-marathons are run, art houses are renovated, festivals are organized, new scientific and research workplaces are built, and investments are made into the future.

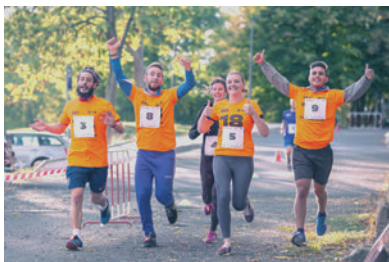

All of this is surrounded by a stunning countryside, the beauty of which has not been trampled by massive tourism. The world is slowly discovering and appreciating this amazing piece of nature.

During your studies, you will get to know the picturesque post-volcanic landscape of the Bohemian Central Mountains, the dramatic sandstone canyons of Bohemian Switzerland, the rugged Ore Mountains, and the green hills of the Lusatian Mountains. You will hit the roads, climb the rocks, go down the Elbe River on rafts or cycle along the cycle path that run along it all the way to Hamburg. And maybe because of all this you can decide to stay in this region.

We are engaged in a lot of internationally recognized and innovative researches, for example in the field of nanotechnology, toxic substances or smart solutions for urban infrastructure. Simply, science is alive at UJEP.

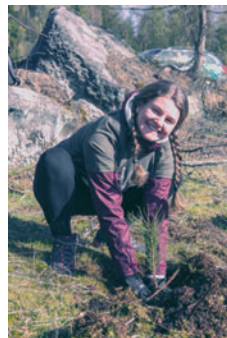

#akademickymed

#usticko

Because Dresden is a stone's throw away, you will have the opportunity to participate in projects implemented in cooperation with TU Dresden and other institutions.

So come on. Join us in the **#north!**

#sazimenabudoucnost

#sjzdimelabe

@ustinadlabem

#kolejeujep

ACCOMMODATION AND FOOD

We say that those who do not live in the dormitory experience only half of university student life. The university campus in Klíše offers accommodation in the three dormitories of K1, K2 and K3.

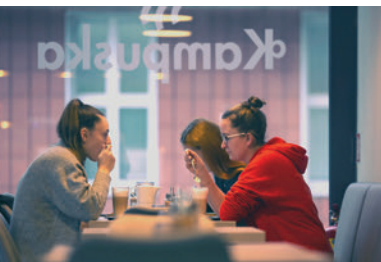

Pubs, restaurants, a swimming pool, an outdoor sports field, a gym, and fitness centers are nearby. Střížovický Hill, which is perfect for romantic walks. The university campus is only a 10-minute walk from the dormitories.

www.skm.ujep.cz

Hungry? Starving while studying! Top up your student chip card. With it you get a discount on food from the daily menu of our two canteens. Our newest canteen is located in the new building of the Center for Natural Sciences and Technical Fields (CPTO) at Pasteurova 3632/15.

You can also visit our ForRest Café in the new CPTO building, where you can enjoy our excellent university coffee, which is roasted for us by the Ústí Roastery, or you can visit the Kampuska Cafe, which, as the name suggests, is right on campus.

Right off the campus, there are other popular cafes such as Resslovka or CoffeeUp (C'UP).

#kavarnakampuska

FINANCIAL SUPPORT

If you become one of our students, we can offer you various forms of financial support. This includes merit-based, social and accommodation scholarships.

When you excel in your studies (and you will) or when you actively participate in events associated with our university (and there are many of them), you will have the opportunity to obtain special scholarships.

Information on getting financial benefits in the form of scholarships can be found on the university's website www.ujep.cz.

#studujujep

ERASMUS+

Learn a foreign language, enjoy a few months of adventure, meet new people. All this can be combined with studying abroad.

Not that we want to send you away again right after finishing your freshman year. We just want to say that the EU and MŠMT (Ministry of Education Youth and Sports) programs we offer to students are generous and interesting. So remember that when the moment is right, you can pack a rucksack and go explore the world for a while.

The most popular program is Erasmus+. Thanks to it, you can spend a whole semester or even a year at a foreign university or even in a foreign company internship.

We have contracts with more than 290 European universities!

Of course, you will also meet foreign students here. Between 100–200 students choose the University of Ústí each year from all parts of the world.

Since 2014, the volunteer student organization Erasmus Student Network (ESN Usti) has been taking care of Erasmus students in Ústí. It organizes cultural, sports and social events for Czech and foreign students. Join them. It's fun and it will make your own trip easier.

Countries where you can study abroad:

Austria, Belgium, Bulgaria, Denmark, Estonia, Finland, France, Germany, Iceland, Italy, Latvia, Lithuania, Hungary, Macedonia, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Serbia, Spain, Sweden, Turkey, Great Britain.

And who knows, maybe when you get on board, you'll also "travel" to Mars.

@erasmus_ujep

@ujepul

UJEP SPORT

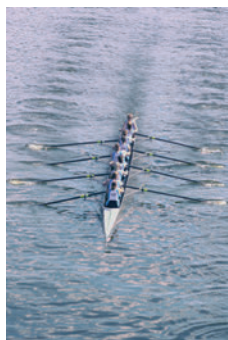

We also develop sports skills and knowledge. Each of us prefers a different sport. This is why we offer a wide range of sports activities.

Our university hockey club HC North Wings fights on the ice, while the university futsal or floorball team wins in the gym, the basketball team hits baskets, and the volleyball team proudly defeats its challengers. The Victoria University Sport Center MSMT UJEP will help advance your sports career and studies.

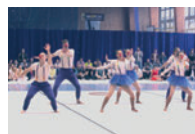

We are not far from the water. We have a swimming facility behind the dormitories in Kliše and our excellent rowing team also overpowers the rough waters of the Elbe River.

Our muscles grow at the UJEP Faculty of Education newly renovated fitness center.

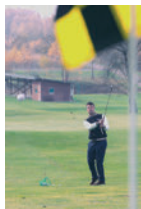

It doesn't end there for us! Our latest additions are a golf and esports team.

THE UJEP SCIENCE LIBRARY

The UJEP science library offers books, magazines, qualification theses of our graduates as well as access to a number of global databases (e.g., Web of Science, Science Direct, ProQuest etc.). The Ebsco Discovery Service multi-search engine is available to students to facilitate resource searches.

All databases can be used from the comfort of your home. A special section of the library fund is dedicated to an Austrian Library and a German library is hidden under the name CEPRONIV. You will also find the European Documentation Center there. You can do research, study, copy, scan and borrow materials so you can study at home. You do not have to go to the counter to check material out, you can use a SelfCheck device and also a self-return terminal is available. Take advantage of the study rooms with computers, Wi-Fi connection and enjoy the beautiful view of the campus.

Connect to us on Facebook and Instagram where there is a schedule of seminars, author readings, travel talks, concerts, exhibitions, or yoga lessons.

FACULTY OF MECHANICAL ENGINEERING

ABOUT THE FACULTY

How do you start your career with as much energy as possible in the fields of energy, engineering, and the material sciences? The Faculty of Mechanical Engineering has expert educators, modern laboratories, uses cutting-edge technologies and already has several patents of its own.

Students are often interviewed by prospective employers from the region even before graduation.

The faculty collaborates with 170 industrial enterprises, which offers students a wide possibility of career choices. The completion of the CEMMTECH building in 2022 was a major accomplishment.

FACULTY ACHIEVEMENTS

Our accredited study programs have practical real world applications and take into account the labor market and what it demands. Thanks to our eminent experts and their cooperation with the manufacturing sector, we already have several patents. One major success was the completion a five-year research project that led to the development of a new mold alloy for tire pressing and the creation of a nano-coating that tripled the lifetime of the mold. We also worked on developing a measuring station for non-contact inspection of shaped glass, where the faculty received a utility model.

Currently the faculty is working on several large projects, such as finding ways to use secondary energy products in the economy, new methods of high-performance laser welding of critical components based on Cu, Al, Cu-alloys and Al-alloys for the transport and energy industries and last but not least, the issue of energy utilization of brownfields in the Ústí Region.

The Faculty of Mechanical Engineering cooperates with secondary schools through the "Faculty School" statute.

ABOUT THE FACULTY

If there are real superheroes, they are undoubtedly at the Faculty of Environment. Where else would you learn to save what someone else has damaged, repair damage and prevent it from happening again? Environmental care will be an important field of study and discipline the future. In our region, it has developed within the context of the specific needs of our high-exploited environment.

#fzpujep

FACULTY ACHIEVEMENTS

In cooperation with the Health Institute in Ústí nad Labem, we monitor the movement of heterogeneous substances in the environment and research their effect on human health. Together, we founded a top research facility – the Center for Research on Toxic Substances in the Environment (CADORAN, Centre for Advanced Organic Analyses). In cooperation with the UniCre Research Center, we have been running the Center for Advanced Chemical Technologies since 2018, which offers research facilities for chemical industry in our region. Faculty researchers participated in the development of devices for the pyrolysis of biomass and sewage sludge, the development of antibacterial nanofiltration materials or the development of magnetic sorbents produced from iron waste for wastewater treatment.

#nanomaterialy

Since 2002, we have been closely cooperating with the CHKO administrations (Elbe Sandstones and Czech Central Highlands) and national parks (Czech Switzerland) and The Nature and Landscape Protection Agency of the Czech Republic.

In 2012, we started mapping the pollution and floodplain development of river systems (Jizera, Ploučnice and Ohře Rivers) and dams. The research is carried out within the framework of scientific projects of the Grant Agency of the Czech Republic and university projects in cooperation with the Institute of Inorganic Chemistry AV ČR (Academy of Science CR), Palacký University in Olomouc and a Hungarian University in Szeged.

Thanks to our state-of-the-art GIS equipment, abandoned villages in the Ore Mountains Foothills were mapped, a database of 3D models of peace crosses in the region and digital 3D model of a number of cultural monuments in the region were created, including a large-format 3D print of the entire Mostecká basin before and after the start of surface mining. These mappings and modeling contributed to the placing of the Ore Mountains on the UNESCO World Heritage List. We are the only scientific and research workplace in the Czech Republic that operates its own aerial laser scanner (so-called LiDAR), thanks to which we are able to create and analyze vegetation.

An international team around Professor Valentina Pidlisnyuk is working on growing an energy ornamental grass *Miscanthus x giganteus* on contaminated soils. The team is involved in several projects aimed at recovering heavy metals, improving soil parameters, and research on the cooperation of ornamental grass and soil microorganisms in the degradation of oil pollution or in the production of paper from biomass.

The Julius von Payer Research Institute for Arctic and Subarctic Research was established at the faculty, bringing together specialists from across UJEP with relationships to biotopes in cold regions of the Earth.

The faculty also cooperates with the Czech police to look into environmental crimes.

#dumumeniustinadlabem

FACULTY OF ART AND DESIGN

ABOUT THE FACULTY

Create in one of the 16 studios, that overlap to other faculties, to the city and even beyond the borders of the republic. Prestigious and interesting personalities, modern technology, traditional and non-conformist gallery spaces and specialized workshops and graduate in the open air even if it is raining. Luck.

FACULTY ACHIEVEMENTS

Our teachers, students and graduates win awards in national and international competitions including exhibition projects such as The Red Dot Design Award, Czech Grand Design, The Jindřich Chaloupecký Award, The Essl Art Award EEE, The National Award for Student Design, The Master of Crystal and Designblok.

In addition, every second year we award our own prestigious EXIT Award for students at art universities and academies in the Czech Republic and Slovakia.

#cenydesignbloku

#zimmisklizen

@galerie_emila_filly

ABOUT THE FACULTY

At the elegant building of the Faculty of Arts, work is being done on mapping of the national memory. With state of the art equipment, research is carried out using historical sources and in the field. The world is being traveled through. Speak foreign languages and establish international cooperation. The associated University of Dresden is just a stone's throw away, and the nearest café is on the ground floor.

FACULTY ACHIEVEMENTS

Cooperation in successful exhibitions, involvement in international research, exhibitions overseas, the publication of important professional work, the organization and co-organization of conferences, obtaining projects and scholarships for our academics and students.

Without Borders (National Gallery in Prague); Children born of war – past, present, and future (Horizon 2020); the Broken Wings exhibition (Washington D. C.); unique edition series Libri Civitatis; a conference on the anniversary of the Czech Constitution (Senate CR); Fulbright – Masaryk Scholarships – J. Goll Award and many others.

But primarily – educated and satisfied graduates and students.

We actively advocate for the success of the UJEP Faculty of Arts, even though, like Albert Einstein, we know that it is not and must not be the only or even main goal.

#katedrahistorie

#ffujep

#universitylife

#fzsujep

FACULTY OF HEALTH STUDIES

ABOUT THE FACULTY

Education that teaches us how to prevent illness and injuries, how to develop health and care for it are the fields of the future. The opportunity to apply theoretical knowledge immediately in practice at local hospitals and clinics is possible thanks to our close cooperation with Masaryk Hospital in Ústí. This a great advantage for the Faculty of Health Studies in Ústí.

FACULTY ACHIEVEMENTS

12 clinical workplaces in cooperation with the Masaryk Hospital in Ústí nad Labem allow you to transfer theoretically knowledge and skills immediately into practice.

In the Prevention and Health Support Laboratory at the FZS UJEP (Faculty of Health Studies), you will examine not only fellow students and employees of the FZS, but also the general public. The laboratory's researches what is a healthy lifestyle, nutrition, physical activity, mental hygiene and the occurrence of risky behavior and addictions.

The teaching of subjects focused on biochemistry is done at the Institute of Biomedicine and Laboratory Diagnostics.

You dig deep into the study of human movement with the help of modern equipment at our Laboratory for the Study of Movement.

#sensoryintegration

#noc_vedcu

ABOUT THE FACULTY

Nature? Yes! But we have also opened up nano information and GIS technologies, environmental geography, computer modeling, analytical chemistry, toxicology and so on. And the brand-new building of the Science and Technology Center full of state-of-the-art laboratories and specialized classrooms.

#studujprfujep

FACULTY ACHIEVEMENTS

Academic staff and students are why we succeed. That is why we appreciate the fact that there is a permanent and long-term interest in studying here. During their studies, students have achieved with awards such as the Award of the Minister of Education, Youth and Sports or the Good List of the Chamber of Commerce.

But the most important success for us is the employment of our graduates in the labor market.

For you, the applicant, there is this interesting information, the faculty is located in the newly built Center of Natural Sciences and Technical Studies of UJEP.

The classrooms are equipped with the most modern technology. Laboratories and relaxation zones provide students and academics with an excellent environment for study and creative work.

#ScienceUJEP

#karieraodprirody

#CPTO

FACULTY OF EDUCATION

ABOUT THE FACULTY

The faculty prepares students not only to be teachers, social and special educators, but also athletes and other professionals.

FACULTY ACHIEVEMENTS

At FE UJEP, we organize important international scientific conferences such as the International Conference of Sport, Health and Physical Education, the International Conference of Psychomotricity, Challenges of Foreign Language Teaching, the International Didactic Conference Music Education for the 3rd millennium, Cantus Choralis. We also have musical performances, fine art exhibitions, sporting events or workshops and seminars for professionals and the general public.

We support the development of inclusive education in the Czech Republic and abroad. The newly founded Center for Social Innovation and Inclusion in Education enables us, thanks to its research activities, to create an optimal pro-inclusive educational environment in schools and monitors activities based on work with families and the integration of pupils at risk of social exclusion.

The recently renovated sports hall and fitness center create an excellent environment for the training and education of Olympians, and Czech, world and European champions in various sports disciplines. You can try fencing, high-altitude hiking, freediving, movement tracks or the latest non-traditional here with us.

Our goal is to maximize the benefits of creative activity in a practical environment. Students are involved in activities on project teams, where they gather valuable experience applicable not only within their studies, but also in their future life. Creative activities are implemented in the art-pedagogical field, pedagogy, special pedagogy, psychology or kinanthropology. The facilities for research activities at our faculty are provided by modern well-equipped laboratories (EEG laboratory, sports laboratory, digital literacy laboratory).

#katedratelesnevychovyasportu

#tadysenajdes

FACULTY OF SOCIAL AND ECONOMIC STUDIES

ABOUT THE FACULTY

Our faculty prepares the next generation for real life in a global context. Modern disciplines, practical seminars, and experienced foreign and domestic experts in politics, economics, urban management, and smart socio-economic solutions to today's complex social issues.

FACULTY ACHIEVEMENTS

People who have studied at FSE UJEP

Simona Kijonková

Founder and owner of the Zásilkovna Company Ltd.

Known to the public and Forbes magazine as the first lady of Czech e-commerce she has been one of the most influential women in the Czech Republic since 2016. In 2018, she received the title of EY i.e., Entrepreneur of the Year of the Capital City of Prague. The influential newspaper Hospodářské noviny also regularly includes her on the list of Top Women in the Czech Republic.

From 1998 to 2001, she studied Finance at FSE UJEP. She is currently CEO of Packeta Holding, which also includes Zásilkovna. Simona founded Zásilkovna as a start-up eight years ago.

In the holding, she manages 11 companies and 500 employees in many European countries. In addition, she also invests in other start-ups.

Ondřej Janda

Branch manager ve společnosti Equa bank a. s.

"Studying at FSE I didn't only get a degree, but also a lot of other opportunities to become my best self. I had the opportunity to work as an assistant researcher and participate in interesting projects, in the accreditation process, etc. Thanks to being elected to the academic senate, I had the opportunity

#nasever

#jsmefse

to directly influence events and follow the progress of the university. I still have excellent relations with the faculty and the university. At the same time, thanks to Erasmus, I spent part of my studies in Scotland and I am still in touch with many friends from all over the world that I met during that time. These diverse activities were highly valued by the HR manager during my first job interview after graduating from UJEP. I now focus on the same things as a manager when I choose bankers to join my team.”
